SK Biopharmaceuticals is engaged in various social value (SV) activities to fulfill its role as a member of the local community. In particular, we are carrying out social contribution activities with the affiliated companies of SK Group, mainly in Seongnam, where we are located. Furthermore, we plan to expand the scope of our activities and develop various social contribution programs to create more social value and fulfill our responsibilities as a member of the local community.

Warm-tact Project

SK Group is running a Warm-tact project that provides free meal boxes to contribute to solving the meal problem of low-income families. SK Biopharmaceuticals is making donations to support meals for underfed children and visiting Anna's House, a shelter for the youth and homeless located in Seongnam, to deliver free meal boxes.

Clothing Sharing

SK Biopharmaceuticals regularly donates clothing to Anna's House in Seongnam, with which it has made a relationship through its Warm-tact project. SK Biopharmaceuticals employees also organize and pack clothing from their homes as a part of their support for vulnerable people at Anna's house.
